ISO rating

Our new ISO (Insurance) rating went into effect on May 1st. Our rating has improved from an 8b rating to a rating of 5. The ISO scale is a 1-10 rating with 1 being the best rating and a 10 being the worst. For a rural fire district without a municipal water / hydrant system, a rating of 5 is very good.

This improvement is the result of a number of things – but the primary factors relate to our staffing levels (evaluated by how many properly trained personnel we average responding to a structure fire and our capability to suppress fires (evaluated primarily on the pump and tank capacity of responding apparatus and the resulting determination of how much water we can flow onto the fire (Fire Flow).

We have achieved this by

1. Increasing staffing responding to fires (primarily through our Resident Firefighter program, Water Tender Operator program, and Firefighter Support program).
2. Increasing our Fire Flow capacity (Engine 122 and Water Supply 125 both have pump capacities in excess of 1000 Gallons per Minute) and the amount of water we respond to on an initial attack fire.
 - a. Engine 121 – 500 gallons
 - b. Water Tender 121 – 3000 gallons
 - c. Engine 122 – 500 gallons
 - d. Water Tender 124 – 1250 gallons
 - e. Water Supply 125 – 500 gallons
 - f. Rescue 124 – 400 gallons

Total Water available = 6150 gallons able to be dispatched to the incident from Central Fire.

Through this process, one deficiency that I have identified is our lack of a Reserve Engine. Currently, when Engine 121 is out of service or on a Strike Team assignment, we are forced to move Engine 122 to Station 1. If another apparatus is out of service, that void is unfilled. As a result, we lose our initial attack capability in the affected area and more importantly, lose the water and pump capacity.

To remedy this issue, our Firefighter's Association has agreed to start a fundraising project to raise the funds necessary to purchase a new Water Tender / Engine. Once purchased, this apparatus would replace Water Supply 125 in Sheep Ranch with a Water Tender and would allow us to assign Water Supply 125 to Swiss Ranch as an engine. Engine 122 would be relocated to Glencoe and would be designated as our reserve engine. The end result would be an increase in our pumping capacity, water capacity and most importantly it would allow us to function at the necessary minimum level even when one of our apparatus was unavailable. Based on past experience, the cost for a Water Tender that would meet our needs and be mechanically sound and reliable is in the area of \$35,000. The Association has undertaken to raise these funds. This will probably take quite some time, but once accomplished I believe this will make a significant contribution to maintaining and perhaps improving even further our fire protection to the Fire District.

Central Calaveras Fire has 5 new volunteer firefighters graduating from the Calaveras County Fire Academy. The graduation will be Saturday, June 4th at 6:00 PM at the Calaveras High School Performing Arts Center.
